DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kreitzer et al.

Kreitzer et al. (US Patent Number 6,195,209 B1) discloses:

- Regarding claim 1, a projection lens (Figure 10, element 13) having a zoom function that forms a projected image (column 2, lines 12-13), corresponding to an image signal on the screen (column 2, lines 21-23); a zoom state detection section that detects a zoom state of the projection lens (column 2, lines 13-18); and an uneven color correction section (i.e. correction of chromatic aberrations) that performs uneven color correction on the image signal based (column 3, lines 11-14) on a detected zoom state (column 9, lines 32-36).
- Regarding claim 4, a light valve (i.e. DMD, LCD and the like; column 2, lines 64-65) that modulates at least one of the transmitted light and reflected light according to the image signal (column 3, lines 6-10).

- Regarding claim 6, a method for detecting the zoom state of the projection lens (column 2, lines 12-18); calculating uneven color correction data (i.e. correction of chromatic aberrations; column 3, lines 11-14) according to a detected zoom state (column 9, lines 32-36); and performing the uneven color correction on the image signal using the calculated uneven color correction data (column 3, lines 11-14).

Allowable Subject Matter

3. Claims 2-3 and 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

- a. Regarding claim 2, the prior art of record neither shows nor suggests an uneven color correction section including a memory in which uneven color correction data according to the zoom state is stored.
- b. Regarding claim 6, the prior art of record neither shows nor suggests performing the uneven color correction on the image signal using the calculated uneven color correction data.

Response to Arguments

5. Applicant's arguments filed on 04/28/2005 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pinhanez (US Patent Number 6,431,711 B1) discloses a multiple-surface display projector with interactive input capability.
